

BEFEKADU AMDEHAYMANOT DESALEGN

Full-Stack Developer, Gondar, Ethiopia

 amdehaymanotbefekadu@gmail.com

WHO AM I ?

As a passionate and aspiring Full-Stack Developer based in Gondar, Ethiopia, I bring hands-on experience in building scalable web applications using the MERN stack. My most notable project involves developing a full-featured e-commerce website for a local business, Abay Garment. Though the platform is still under development, it demonstrates my ability to manage frontend and backend complexities, particularly with Redux Toolkit for state management.

I am an AI enthusiast, continuously exploring how intelligent systems operate. I embrace challenges, learn quickly, and am eager to contribute to impactful technology solutions.

WORK EXPERIENCE

Abay Garment — Full-Stack Developer(final year project)

Apr 2025 – Present

- Designed and developed an e-commerce platform using MongoDB, Express.js, React.js, and Node.js (MERN).
- Used Redux Toolkit for efficient and scalable state management.
- Collaborated with team members to implement admin dashboards, user management, and chat integration.
- Gained experience in local deployment practices and feedback-driven iteration.

Job posting app– Worked as a System and Design Analyst(Internship project)

Jan – Feb 2025

- Worked with my fellow developers on a job posting app for University of Gondar's IT department and Data Center in my time as an intern there.
- We developed it using React for the front-end and Django for the Back-end.
- I was assigned as a System and Design Analyst as a result I designed the front-end's web frame using tools that I found out and learned how to use known as figma after I got

assigned to this job.

- Collaborated with team members to implement the design that I gave them to reality.

TECHNOLOGIES & TOOLS

- Languages: JavaScript
- Frontend: React, Redux Toolkit, Tailwind CSS
- Backend: Node.js, Express.js
- Database: MongoDB
- Version Control: Git, GitHub
- Tools: Thunder Client, VS Code
- Learning Interests: Artificial Intelligence, Machine Learning Concepts

PROJECT HIGHLIGHT

Abay Garment E-commerce Platform

A responsive and scalable online store tailored for a local garment business. Features include multi-role dashboards, chat-based customer support, local pickup logic, and a manual AI chatbot integration for support navigation.

EDUCATION

BSc in Computer Science

University of Gondar

2021 – 2025 (Expected)

INTERESTS & EXTRAS

- Open to relocation and remote work opportunities
- Excellent team collaboration and communication
- Fast learner with a growth mindset
- Interested in deploying real-world AI assistants
- Inspired by solving local business challenges through tech
